

# TECHNICAL DATA SHEET: COATING 4801

## **DESCRIPTION:**

4801 coating is a black thin flexible film, applied to dynamic automotive gasket seals.

It is a coating solution which thermally cures to form a dry film.

## **PROPERTIES**

Low coefficient of friction	0.20 to 0.50
Coefficient (C) of friction after 15.000 cycles	+10% <C<+15%.
Abrasion resistance	Good
Elimination of friction related noises	Yes
UV resistance	>1000hrs
